INSTALLATION INSTRUCTIONS

PT50-59736 INSTALLATION TOOL
FOR USE WITH PB50-36321 & PB50-36322 PIVOT BUSHINGS

Popular on Hendrickson Intraax/Vantraax Suspensions

1. Lubricate ACME threaded bolt and thrust bearing with synthetic grease before each use
2. ACME bolt requires a 1 5/8" socket
3. Use of high torque drill is recommended over impact gun
4. Set screws are to be used as alignment pins for the installation and/or removal of the OEM rubber pivot bushings
5. Be sure liner is placed in the ID of the pivot bushing to insure the bushing remains square throughout the installation

KIT CONTAINS:
(1) ACME Threaded Bolt
(1) Thrust Bearing
(2) Flat Washers
(2) Set Screws
(1) End Cap
(1) Guide Tube
(1) Drive Plate
(1) Removal Spacer
