ATRO continues to analyze, test and improve ATRO’s polyurethane materials. ATRO’s new Hi-Temp material provides:

- Higher tensile strength
- Improved vibration isolation
- Resistant to chemical attack
- Tested at 275 degrees continuous temperature

Also ATRO has improved the Product Line with the following:

- Expanded Kit Offering
- New High Temperature Catalog
- New High Volume Cab & Engine Mount Guide (featuring new high temp parts/kits)
- Reduced Pricing
